

Professional Web Development Portfolio

A showcase of bilingual websites, custom CMS solutions, and enterprise-grade digital platforms built with modern technologies and user-centric design principles.

Bilingual Website Development

Leshi Singh Official Website

A uniquely developed bilingual website (English & Hindi) created **without Google Translator**. Both languages feature dedicated content and layout structures, ensuring superior accuracy, readability, and user experience.

Website URL: <https://leshisingh.com/hindi/index.php>

Technical Excellence

Cross-Device Compatibility

Fully responsive and mobile-friendly design with cross-device compatibility

Modern Framework

Built using modern HTML5, CSS3, JavaScript, and Bootstrap framework

Performance Optimization

Minimal custom CSS for cleaner, faster performance and optimal loading

User Experience

Smooth animations and interactive UI for enhanced user engagement

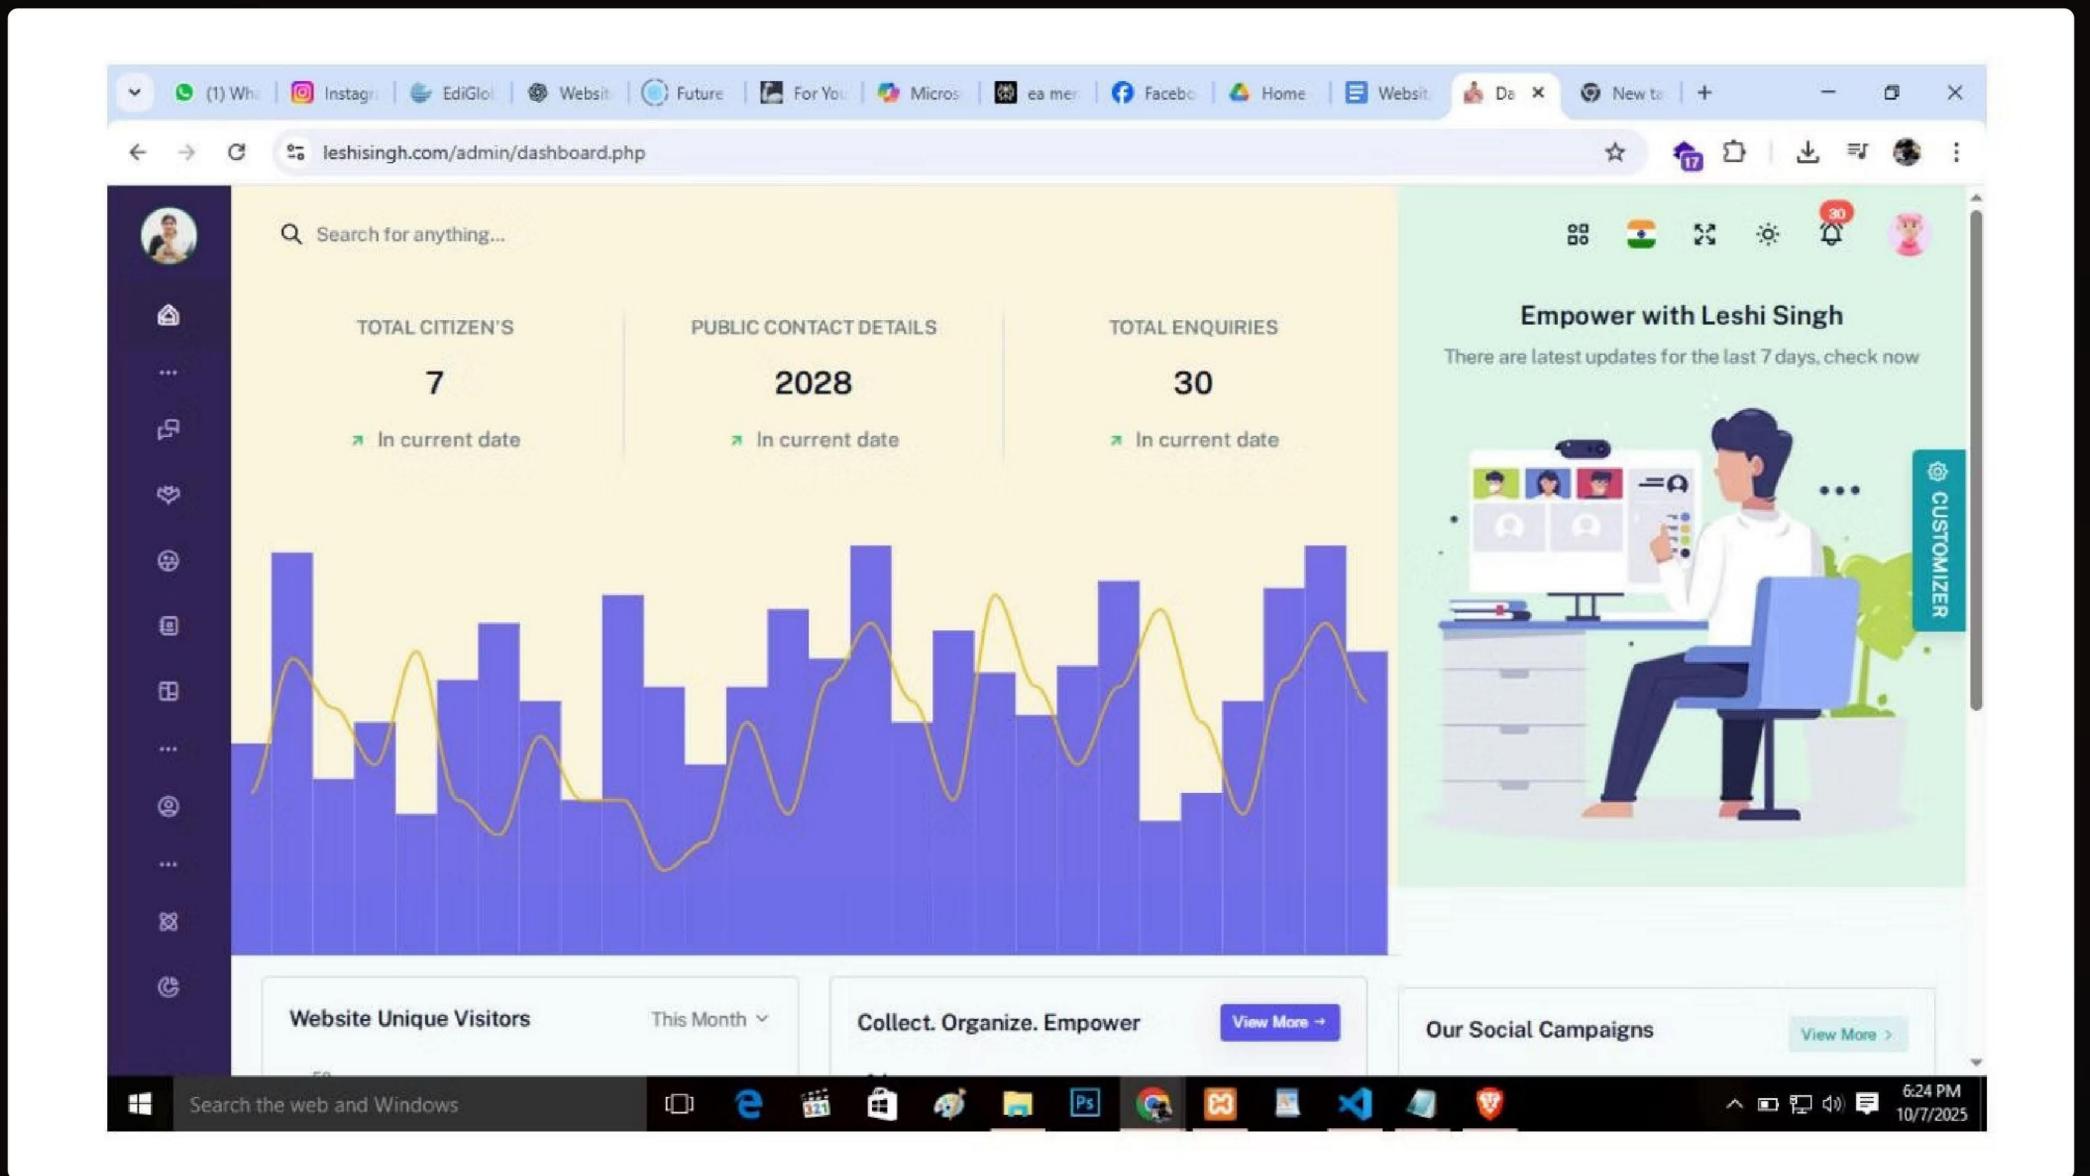

Speed Enhancement

Optimized loading speed using Lazy JS for superior performance

Backend Development

Developed in PHP for dynamic content management and scalability

Custom CMS & Admin Dashboard

Secure Authentication

Admin login panel with encrypted password authentication and role-based access control

Bilingual Management

Dynamic content management for English & Hindi with real-time updates

Media Control

Image and document upload system with validation and format checking

The website includes a custom-built Content Management System developed in **PHP 8.2.28** and **MySQL**, enabling complete control over the bilingual website. The CMS allows admins to easily add, edit, or delete text, images, and multimedia content through a user-friendly dashboard.

Admin URL: <https://leshisingh.com/admin/dashboard.php>

01

Dynamic Modules

Pages, gallery, news, and announcements management

02

Responsive Interface

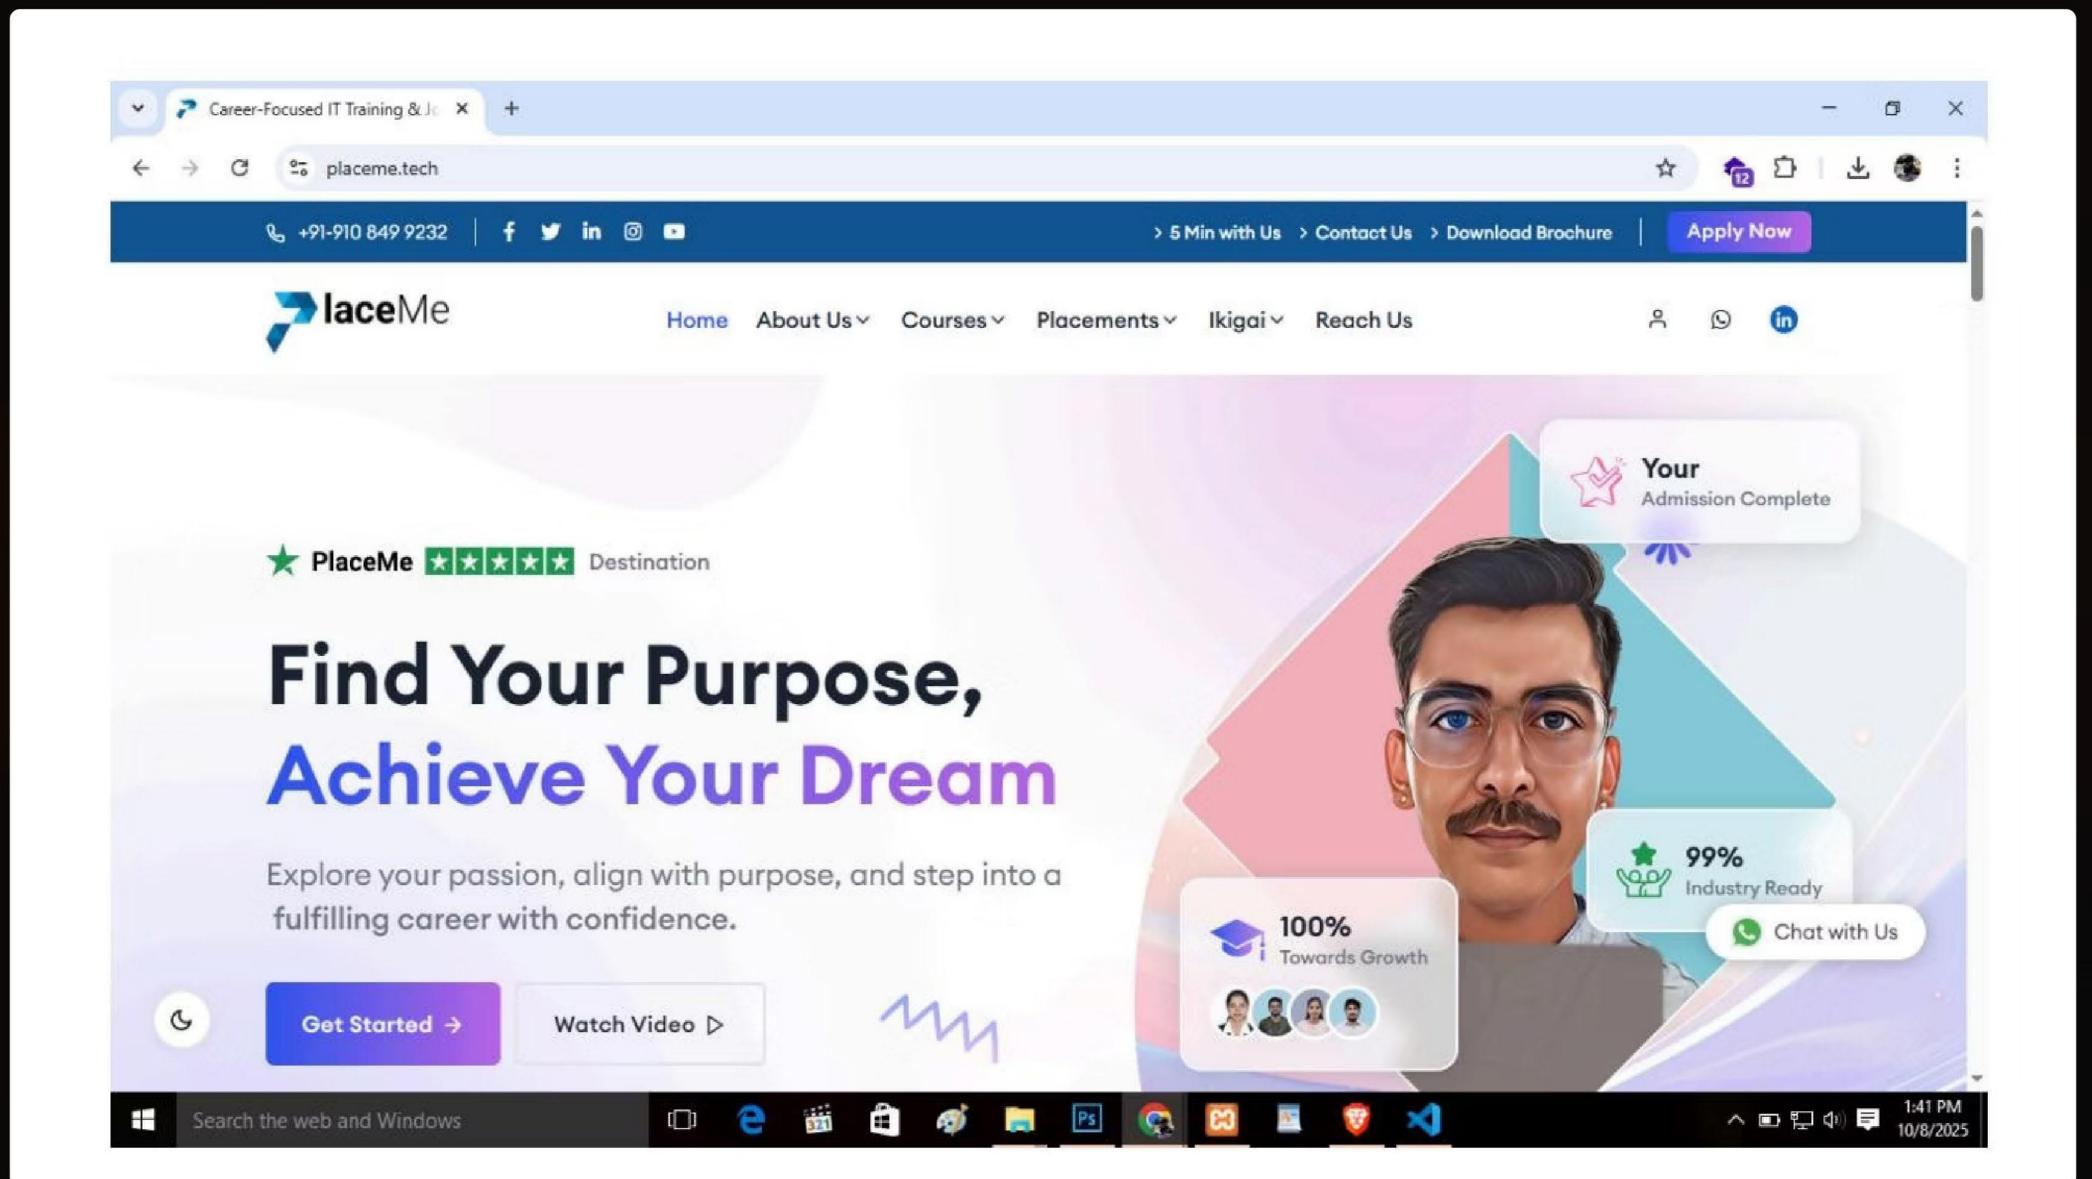

Dashboard works seamlessly on desktop and mobile

03

Optimized Performance

Hostinger CDN with HTTP/3 support

Key Integrations: Google Analytics (GA4), Elfsight Widgets, YouTube Integration, jQuery 3.7.0, Swiper, SweetAlert2, Choices.js, Bootstrap

PlaceMe: IT Training & Placement Platform

PlaceMe is a professional IT training and placement platform that connects learners and employers. The frontend showcases courses, trainers, success stories, and recruitment partnerships in a modern and responsive layout.

Website URL: <https://placeme.tech>

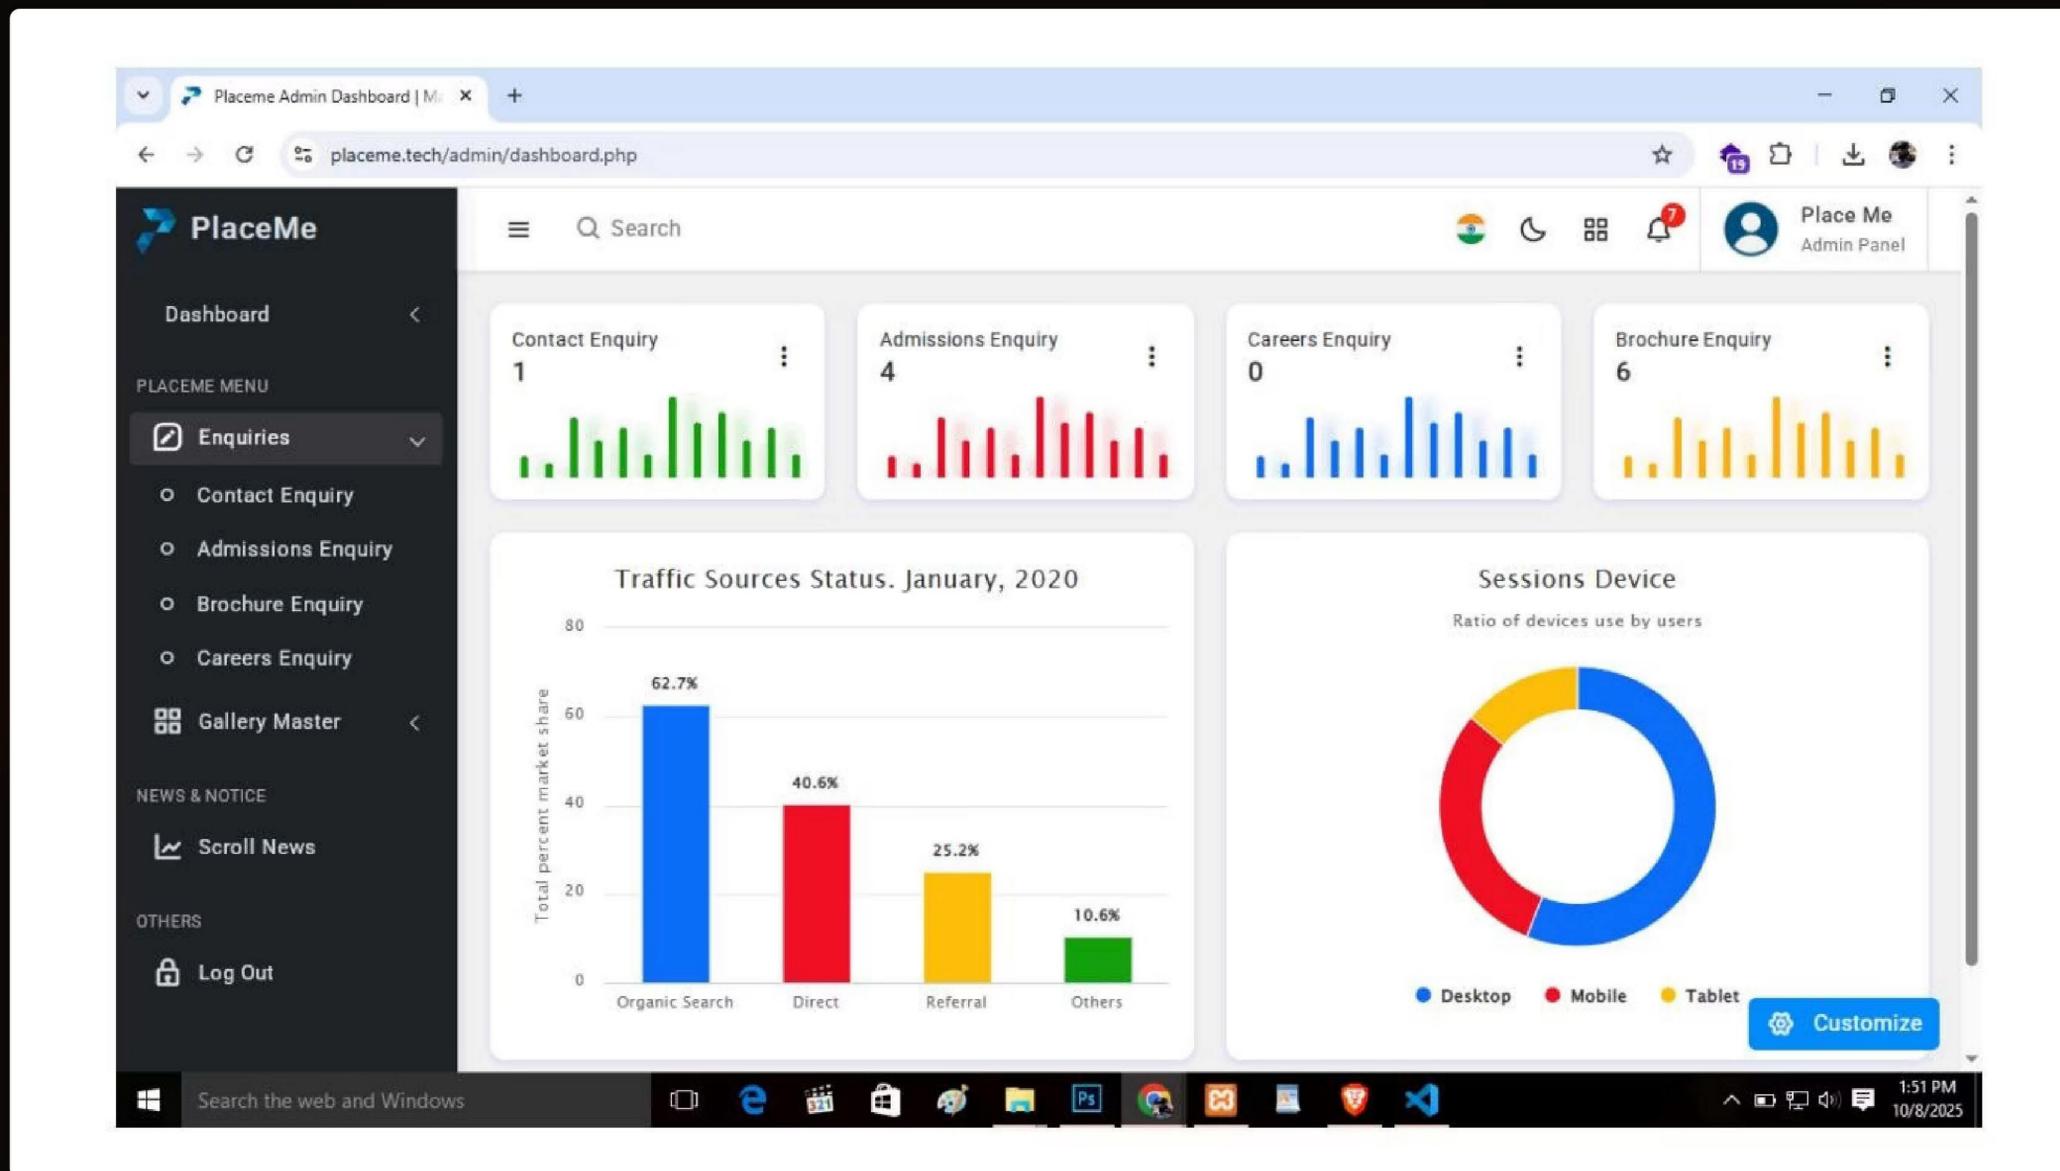

Frontend Technologies

- React + Vite for fast, modern UI
- React Router 7.2.0 for navigation
- Bootstrap UI framework
- Swiper and Modernizr libraries
- Font Awesome icons

Analytics & Integration

- Google Analytics & GA4
- Google Tag Manager
- WhatsApp Business Chat
- Responsive, mobile-first design

PlaceMe Admin CMS Backend

A secure and dynamic CMS built for managing course listings, student data, testimonials, and recruiter sections. The panel ensures data encryption, role-based access, and simplified control for the admin team.

1

Advanced Analytics

ApexCharts.js and Highcharts 8.2.0 for data visualization

2

Modern Framework

React with React Router 7.2.0 for seamless navigation

3

Secure Backend

PHP 8.1.33 with encrypted password authentication

4

Rich UI Libraries

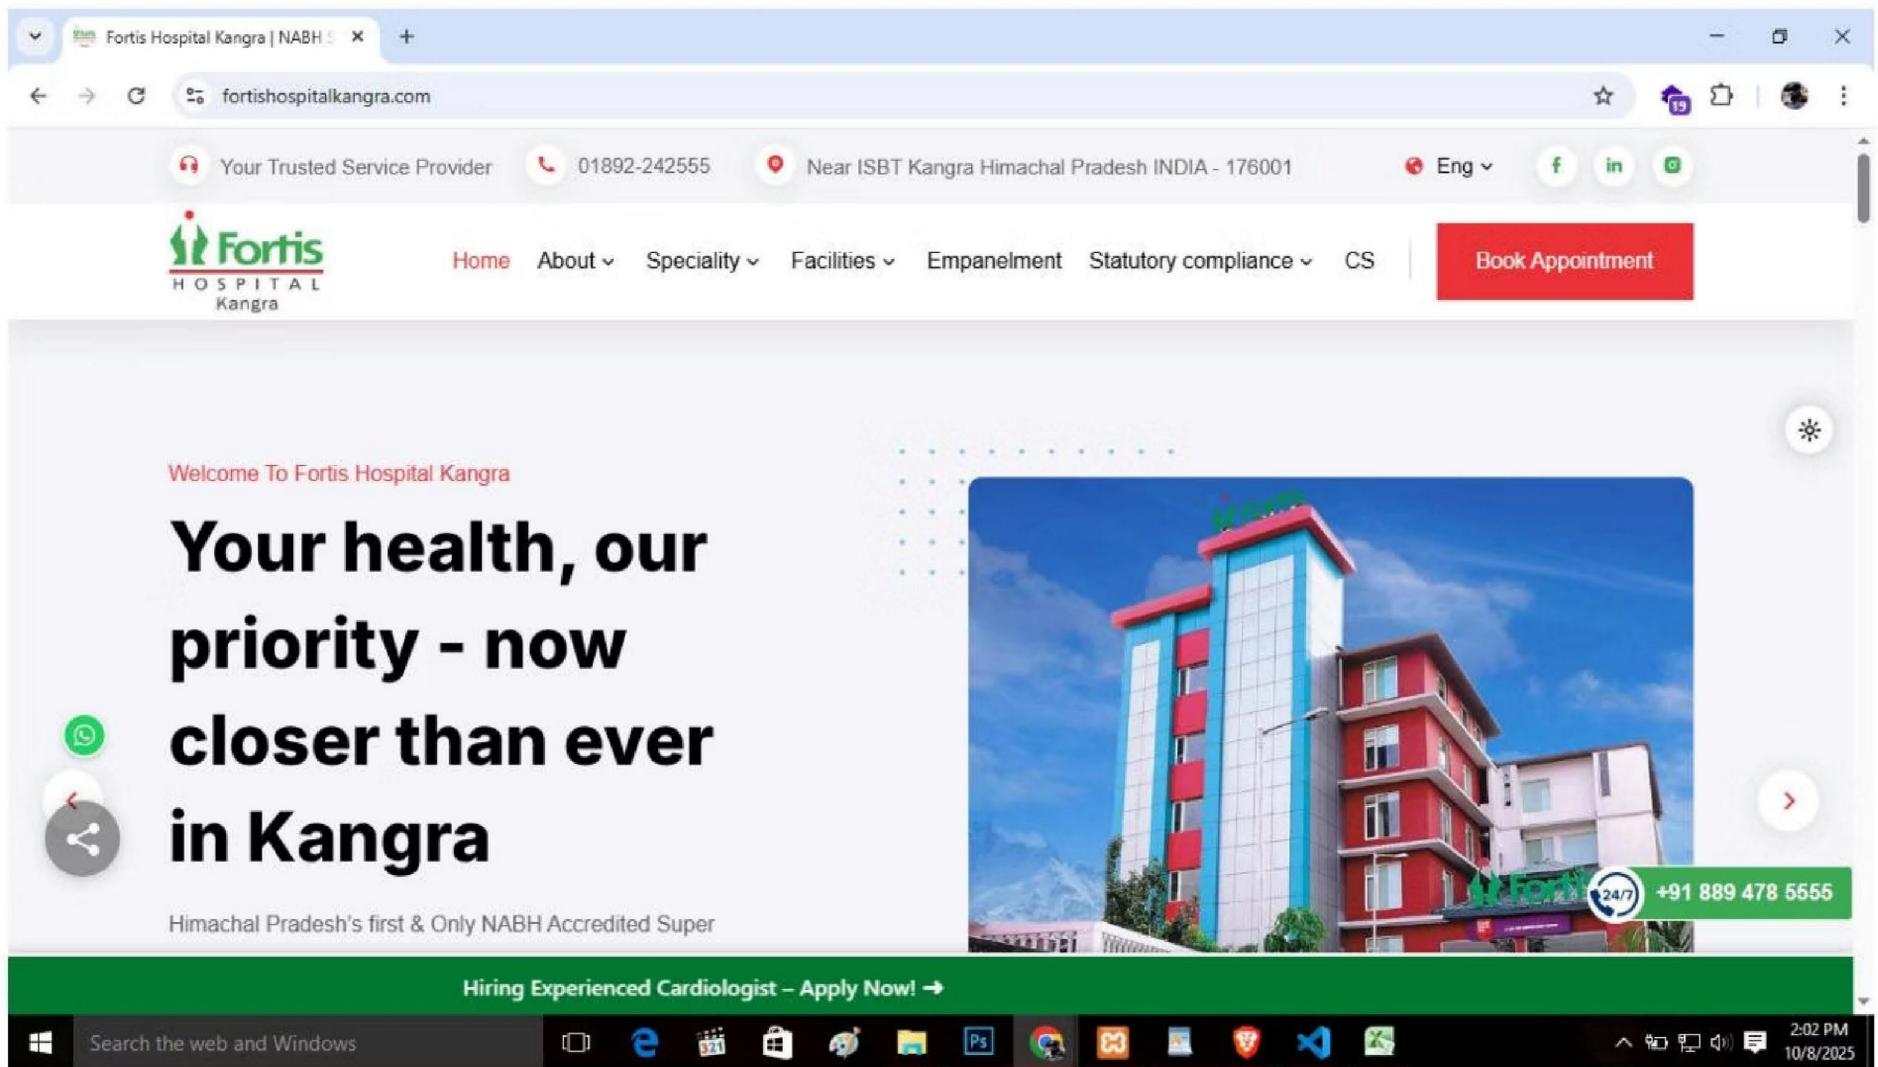

jQuery UI, metisMenu, Swiper, Modernizr, core-js 3.2.1

Server & Performance

Powered by LiteSpeed web server for optimal speed and reliability. Integrated with Google Tag Manager and WhatsApp Business Chat for enhanced functionality.

Security First

Encrypted password mechanism implemented for admin authentication, ensuring data protection and secure access control.

Fortis Hospital Kangra

Official website of Fortis Hospital Kangra, a NABH-accredited multi-speciality hospital offering advanced healthcare and emergency services. The site highlights departments, doctors, and facilities with a clean and responsive design.

Website URL: <https://fortishospitalkangra.com>

Healthcare Excellence

Dynamic pages for departments, doctors, admissions, and facilities with emphasis on accessibility and reliability

Advanced Analytics
